Radial Pumps
C11, H20, H80

Fixed radial piston pump brochure
**H80 Radial Pump**

**CODE KEY BREAKDOWN:**

- **H** — High Pressure Shaft Seal for Pressure Priming (250 PSI MAX)
- **F2** — Viton Seals (Specify only if desired)
- **L** — 5.4 GPM — 3000 PSI Maximum @ 1800 RPM
- **M** — 3.1 GPM — 5000 PSI Maximum @ 1800 RPM
- **H** — 1.65 GPM — 10,000 PSI Maximum@ 1800 RPM

**Foot mounting bracket must be ordered separately in addition to the model number selected.**

Example: (1) 80H Pump
(1) PF8-10S Foot mounting bracket

---

**C11 Radial Pump**

**CODE KEY BREAKDOWN:**

- **C5 RH** — Right Hand Rotation
- **F2** — Viton Seals (Specify only if desired)
- **C4** — 5.9 GPM — 3000 PSI Maximum @ 1200 RPM
- **C5** — 7.6 GPM — 5000 PSI Maximum @ 1200 RPM
- **C11** — 10.5 GPM — 5000 PSI Maximum@ 1200 RPM

**Foot mounting and flange mounting brackets must be ordered separately in addition to the model number selected.**

Example: Foot Mounting Bracket
(1) C11-F2 Pump
(1) PF1C-F2 Foot Mounting Bracket

Flange Mounting Bracket
(1) C11-F2 Pump
(1) FPFC-10S Flange Mounting Bracket

*Direction of rotation applies only to the Model C5 pump and must be specified by code number when ordering a C5 unit.

Note: When foot mounting bracket is not used, any other style of bracket that will clamp around the cylindrical projection of the shaft end cover plate may be substituted.
Radial Pump Model Codes

H20 Radial Pump

**H** — High Pressure Shaft Seal
For Pressure Priming (250 PSI MAX)

L — 1.25 GPM — 3000 PSI Maximum @ 1800 RPM
H — 0.79 GPM — 6000 PSI Maximum @ 1800 RPM

*F2 — Viton Seals (Specify only if desired)

*These items are optional extras and should be specified by code only when desired. Consult a FluiDyne representative for assistance when ordering ISO-FLO modifications.

Foot mounting bracket must be ordered separately in addition to the model number selected.
Example: Foot Mounting Bracket
(1) H202 Pump
(1) PF2-10S Foot Mounting Bracket

Note: When foot mounting bracket is not used, any other style of bracket that will clamp around the cylindrical projection of the shaft end cover plate may be substituted.

---
